

Neisseria gonorrhoeae, Strain 1137292

Catalog No. NR-56643

For research use only. Not for use in humans.

Contributor and Manufacturer:
ATCC®

Product Description:

Bacteria Classification: *Neisseriaceae*, *Neisseria*

Species: *Neisseria gonorrhoeae*

Strain: 1137292

Original Source: *Neisseria gonorrhoeae* (*N. gonorrhoeae*), strain 1137292 was isolated in 2014 from a urethral sample of a 37-year-old male in Israel.

Comments: *N. gonorrhoeae*, strain 1137292 was deposited as part of the Global Priority Superbugs Collection. NR-56643 was deposited as resistant to ciprofloxacin and tetracycline.

N. gonorrhoeae is a Gram-negative, aerobic to facultatively anaerobic, diplococcal bacteria that colonizes the genital, rectal and oral mucosa and is the causative agent of gonorrhoea, a sexually transmitted infection of the genital tract.^{1,2} Gonorrheal infections may also occur in the rectum, pharynx and eyes. Left untreated, disseminated gonorrheal infection (DGI) may develop, resulting in septic arthritis, endocarditis and skin manifestations.^{2,3} While once easily treatable with antibiotics, *N. gonorrhoeae* is rapidly developing resistance to every major class of antibiotics.^{2,3}

Material Provided:

Each vial contains approximately 0.3 mL of bacterial culture in Chocolate broth supplemented with 10% glycerol.

Note: If homogeneity is required for your intended use, please purify prior to initiating work.

Packaging/Storage:

NR-56643 was packaged aseptically in cryovials. The product is provided frozen and should be stored at -60°C or colder immediately upon arrival. For long-term storage, the vapor phase of a liquid nitrogen freezer is recommended. Freeze-thaw cycles should be avoided.

Growth Conditions:

Media:

Haemophilus Test medium broth or Chocolate broth or equivalent

Chocolate agar or equivalent

Incubation:

Temperature: 37°C

Atmosphere: Aerobic with 5% CO₂

Propagation:

1. Keep vial frozen until ready for use, then thaw.
2. Transfer the entire thawed aliquot into a single tube of broth.
3. Use several drops of the suspension to inoculate an agar

slant and/or plate.

4. Incubate the tube, slant and/or plate at 37°C for 1 day.

Citation:

Acknowledgment for publications should read “The following reagent was obtained through BEI Resources, NIAID, NIH: *Neisseria gonorrhoeae*, Strain 1137292, NR-56643.”

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. [Biosafety in Microbiological and Biomedical Laboratories \(BMBL\)](#). 6th ed. Washington, DC: U.S. Government Printing Office, 2020.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S. Government, ATCC®, their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

Use Restrictions:

This material is distributed for internal research, non-commercial purposes only. This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale. This material may be subject to third party patent rights.
